

My academic interests include photography, visual and lighting design. Professionally, I'm working toward a career in lighting design and lighting programming. I'm especially proud of my involvement in Academy of Live Technology events where I've designed and implemented projection visuals. I've also designed and busked lighting for PCAD's Dress As You Please Ball, and I'm very proud of my time as a summer intern at 4Wall Entertainment on the Rock Lititz campus.
